AWARDS

TILE OF SPAIN AWARD WINNERS

The winners of the ASCER 23rd Tile of Spain Awards

The award in the architecture category went to the project “A circular viewpoint”, an urban space featuring extruded porcelain tiles. The winner in the interior design category was “Hill house”, a full refurbishment project for a home where ceramic floor tiles play a starring role.

The jury singled out several projects for special mentions or as finalists, featuring different types and uses of ceramic materials, including projects for façades, homes, museums and restaurants.

PROJECT

DIVINE ABODE

Spellbound a design firm in Bangalore, India, had designed Ishavasya, a residential project, in Bangalore, a tapestry of religious symbolism, woven with subtlety and grace

Spellbound Atelier, a design firm in Bangalore, India has a team of spatial designers. They assist clients in envisaging and realizing the interiors of the most fantabulous spaces in their homes. Their clientele ranges from industrialists, venture capitalists, politicians, celebs to movie stars. They generally design large homes which are sized upwards of 10,000 sq ft and make the architectural shell into a luxuriously furnished home.

Their latest project Ishavasya, Where the Lord Resides has been shortlisted for the 2024 World Architecture Festival.

In the ethereal realm of Ishavasya, where the sacred and the sublime converge, their client, a visionary of the tech world currently living in California, sought to manifest this home of his at Bangalore, as his offering to his Lord.

A NEW ERA IN DIGITAL PRINTING

System Ceramics presents Infinity Sky, opening new horizons in digital printing

The panorama of digital printing for the ceramic sector changes and widens with the introduction of Infinity SKY, the new creation of System Ceramics, the Coesia company. This technological step forward takes printing quality to a higher level, defining new standards in terms of detail and resolution, and fundamental elements for the final result on the tile.

Infinity SKY is based on the well-established Creadigit Infinity, the printer that has raised production performance levels thanks to its unprecedented computing power.
